

Entity Relationship Diagrams

From the last lesson, you might remember that an **entity relationship diagram** (ERD) is a common way to view data in a database. It is also a key element to understanding how we can pull data from multiple tables.

It will be beneficial to have an idea of what the ERD looks like for Parch & Posey handy, so I have posted it again below. **You might even print a copy to have with you as you work through the exercises in the remaining content.**

Tables & Columns

In the Parch & Posey database there are 5 tables:

1. **web_events**
2. **accounts**
3. **orders**
